Thank you for contacting Mohican Veterinary Wellness. Please read the following information. You will be sent a new patient questionnaire to fill out before the first visit once an appointment time is set.

On the first visit I will be getting to know your animal companion on a personal level and their medical history. I plan on this taking approximately one hour. If you have specific treats for your pet, please have them available during the appointment. This first session will include an examination, and an acupuncture treatment, physical therapy or therapy laser treatment, whichever is deemed more appropriate, and will cost \$122. There is a home visit fee of \$22; there may be a mileage surcharge for travel outside of my normal practice area. Additional physical therapy or acupuncture sessions will be \$77, and will last approximately 30 minutes. Combining treatment modalities (example: a physical rehabilitation session with acupuncture and/or therapy laser) will be an additional cost of \$35-\$75, depending on the time needed to perform the chosen therapies. We will decide together what will be most appropriate for your companion. Frequency of treatments is typically once a week to every other week for the first 4-6 treatments, then may decrease to once a month to a few times a year. Diet and herbal medication consultations are also available, and can play a significant role in improving your companion's health.

At this time I am scheduling home-visit appointments on Mondays and Wednesdays, and in-clinic appointments at Fredericktown Veterinary Clinic on Thursdays. I will contact you to find a time during those days that will work for both of our schedules. Currently, I accept cash and check.

I look forward to meeting you and your animal companion soon.

Take care,  
Cheryl Becker, DVM, CCRP, CVA, CVCHM
